- View detailed information including charts, tables, images and more
- Cross-database searching with quick-jump functionality
- Easy over the air updates-no syncing or cards required
- Hospital-specific formulary option

Lexi-Comp ON-HAND is available to the individual user and can also be purchased as a site-wide solution for your hospital or institution

HCN is proud to present Lexi-Comp ONLINE with AHFS - The Complete Clinical Information Solution for Pharmacists, Physicians, and Nurses. Lexi-Comp ONLINE provides clear, concise, relevant content, while AHFS allows you to dig deeper should you require more comprehensive research. Easy-to-use and always up-to-date, Lexi-Comp enables hospital pharmacists and clinicians to improve medication decisions at the point-of-care and positively affect patient outcomes. ONE SOLUTION designed to meet the needs of the entire patient care staff:

**Physicians** - Access concise drug information and treatment recommendations on diseases and conditions quickly and efficiently.

**Nurses** - Utilize patient education materials on diseases, conditions, and medications, in up to 18 languages and access patient management and I.V. compatibility information.

**Pharmacists** - Benefit from two levels of drug information in one resource. Lexi-Comp databases provide clear, concise, and accurate drug information, and AHFS adds more in-depth content and links to the primary literature when further research knowledge is needed.

Lexi-Comp ONLINE with AHFS includes the following databases and modules:

- Lexi-Drugs®
- Pediatric Lexi-Drugs®
- Geriatric Lexi-Drugs®
- AHFS Drug Information®
