

MEDICAL OFFICERS HANDBOOK 8TH EDITION

ABOUT MEDICAL OFFICERS HAND BOOK 8TH EDITION

The Medical Officers Handbook 8th Edition contains guidelines to the management of conditions commonly encountered on the wards and in Emergency Departments. It provides a practical guide to the management of conditions frequently encountered by junior staff and / or those conditions that are often difficult or poorly managed.

This includes practical approaches to issues such as:

- Breaking bad news
- Clinical handover
- Bedside manners common obstetric and gynecological conditions including PV bleeding and threatened miscarriage
- Common dental problems encountered in the ED such as trauma to teeth (avulsion)
- Pain control
- Gastro-intestinal haemorrhage
- Approach to management of the confused patient

And many more...

Thoroughly revised and updated with several new sections. These new sections include both specific clinical scenarios and more generic patient care management areas.

WHAT'S NEW IN THE 8TH EDITION?

A clinical Tools section that includes:

- Advanced Life Support
- Management of acute pain
- Guide to prescribing intravenous fluids and electrolytes
- Clinical handover
- Managing of acutely deteriorating patient
- Adolescent health, particularly management of medically unstable adolescent patients
- Guidelines on oxygen administration
Guidelines for non-invasive ventilatory support
- Australian Curriculum Framework for Junior Doctors
